

Scrub & Polish

The HAWK WS30 dual motor floor machine is a high productivity, low fatigue machine for janitorial floor operators. Cover 30" per pass running two 15" brushes, pads or tools on a minimum 115V, 20 ampere circuit. This innovative design incorporates a special AC 115-230V, 50/60 Hz motor that works around the globe without requiring modifications.

Use to clean, degrease, remove mildew, restore ceramic tile, recoat VCT, chemical free coatings removal, and natural stone or concrete polishing.

The two-piece design allows the handle-carriage to be easily separated from the dual motor head. This is advantageous when equipment needs transport in to hard-to-reach locations or those with restrictive access, such as basements or mezzanines.

Equipped with 6 gallon solution tank and electric pump for wet processes. Collar weights can be removed for lighter touch in polishing and transport.

Engineered Design

- Dual AC-TEFC motors with 11:1 XHD gears
- Drives two counter-rotating 15" pad drivers, producing a 30" scrub path
- 50 ft., (12-3) 2-piece industrial power cord with twist lock
- Control Center is front & center to the operator
- 3-position handle for transport, operation and storage
- 120 lumen LED lights (2- Sides, 2 Forward)
- 10"x2" grooved non-marking transport wheels
- Detachable handle-carriage for transport
- 6 Gallon solution tank with 60 PSI diaphragm pump
- Removable collar weights
- Built in dust control with combo 1.5" or 2" exhaust

Safety

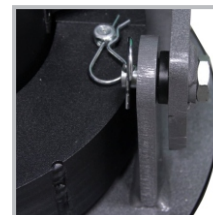

- Quiet 66 dB operation. Meets G42 requirements
- Built with UL listed components

Specifications

Model	WS30
Item #	F-WS30
Pad Size	15"
Power Source	115-230V, 50/60 Hz
Motors (2)	1 HP, TEFC AC
Max Run Amp	14.9
Drive Gears / RPM	11:1 / 165
Power Cord	50 ft., (12-3) 2-piece industrial w/ twist lock
Weight (Total)	264 lbs.
Handle-Carriage	132 lbs
Head w/Motors	132 lbs.
Optional Weights	22 lbs.
Solution Tank	6 Gallon
Solution Pump	60 PSI
